1. Conducts basic- to mid-level business requirements analysis within the Operations or Health Services Division
2. Coordinates regulatory and compliance deliverables
3. Project manages small- to medium-scale projects
4. Performs other duties as assigned

DISTINGUISHING CHARACTERISTICS

The Business Analyst II is the working level classification in the series and is distinguished from the next higher, advanced working level Business Analyst III by the latter's degree of advanced knowledge related to business analysis, responsibility for acting as subject matter expert and assisting with mentoring and training other analysts, and project management of large-scale business analysis projects.

RESPONSIBILITIES

1. Conducts basic- to mid-level business requirements analysis within the Operations or Health Services Division, with duties including but not limited to:
 - Collaborating with management to identify business objectives and develop strategies to achieve them
 - Working closely with stakeholders to identify and understand business needs and developing solutions to business problems through the identification of clear and comprehensive business requirements
 - Leading requirements gathering, documentation, and analysis for new initiatives, system enhancements, or process improvements within the managed health plan.
 - Analyzing and documenting business processes, systems, and workflows in support of business requirements gathering and analysis
 - Translating business requirements into actionable plans and deliverables
 - Managing business analysis projects for the assigned Division, from initiation to completion
 - Analyzing data to provide insights and recommendations to evolve processes to meet new business needs
 - Establishing and championing the use of standardized processes and templates for business requirements documentation
 - Collaborating with project managers and other stakeholders to ensure successful delivery of enterprise-wide projects
 - Collaborating with cross-functional teams, including Information Technology Services and Finance, to ensure a holistic approach to business analysis

2. Coordinates regulatory and compliance deliverables, with duties including but not limited to:
 - Coordinating between all departments within the Division and with the Compliance Division to meet necessary regulatory and compliance deliverables
 - Reviewing new regulatory requirements and providing initial interpretation
 - Assessing new requirements and collaborating with departments to mitigate compliance deficiencies
 - Drafting policies, procedures, and workflows to ensure documented processes accurately reflect current operations and are compliant
 - Coordinating with departments within the Division to prepare audit deliverables and respond to corrective actions
 - Supporting departments with regulatory reporting, including developing reporting requirements and ensuring reports are delivered timely

3. Project manages small- to medium-scale projects, with duties including but not limited to:
 - Managing small- to medium-scale business analysis projects from initiation to completion for the assigned Division
 - Collaborating with stakeholders to manage and ensure project success and consistent application of project management methodologies, standards, tools, and processes and continuous improvement in alignment with business needs
 - Ensuring business needs are well understood and that project teams perform at a high level
 - Identifying and coordinating required ongoing project management documentation for the deliverables, dependencies, critical path, and stability of project-oriented work efforts
 - Coordinating clear and timely communication with project stakeholders
 - Overseeing the tracking and usage of project milestones, tasks, timelines, and resources necessary to meet project objectives and to keep projects within scope, schedule. and resource requirements
 - Utilizing online collaboration and project management software to ensure project status is transparent

4. Performs other duties as assigned
