

Oral Health & Fluoride Varnish Application in the Medical Setting

NEW! A Resource Toolkit for Pediatric Providers

The purpose of this toolkit is to support the implementation of fluoride varnish applications in a primary care setting. This user-friendly toolkit includes:

- Information on how to get started
- Resources for medical providers and staff
- Handouts for families

This toolkit was compiled by the County of Santa Cruz, Local Oral Health Program (LOHP) in partnership with Oral Health Access (OHA) Santa Cruz County and the Central California Alliance for Health (CCAH)

Oral Health Access
SANTA CRUZ COUNTY

Resources for Clinic Staff

- [FV Application, demonstration of Knee-to-Knee position](#) (video 2:20-3:45)
- [Children’s Health & Disability Program \(CHDP\) Steps to Implement FV](#): Guides your clinic leadership team and staff through a step-by-step process to ensure a successful integration of Fluoride Varnish during well-child visits. [CHDP FV Protocol and Standing Order](#), resources referenced in the *Steps to Implement* document.
- [FV Application Office Protocol Sample and Fillable Form](#): This fillable form develops an office protocol that identifies staff roles, responsibilities, and workflows.
